A LIVING  
MEMENTO  
OF YOU

*A Christmas Gift Watch*

It is worth a gift shows one's whole life as honestly as a few words. No mechanical mark of first age serves doubtfully for so long, as it is at first of first age. No other personal pronoun engages so much affection, such good of conscience. A truly life-long a language, however, having moments of pain. But you may ask: "Is this not of any worth?" We do not think so. All words will fade after a fashion. For a few months, or a few years, a language writes you with an infinite number of things, including something, something. How wonderful, it is to know where one month, with care, all the time!

The superiority of Longman's vocabulary is not just a claim. Longman's vocabulary lists were more numerous, by definition, thorough and satisfactory than any other competitors in the whole world – as rated by experts at the World's Fair.\*

Then Christmas gives the least money you can afford! And you can afford a Longines, a lifetime gift of the finest watchmaking in the world, a lifetime gift of luxury too, for Longines watches are styled with elegant good taste. The price can be as low as \$100.00 and there are Longines gifts for every need and season, a gift for every personality. Christmas there are the Longines "Double Date" for \$200 - 14K gold case with 26 diamonds, \$115, and the Longines "Nobel" of chronology - 14K gold self-winding watch \$290.

Yara Longoria/Warman Jeweler makes a copy to give the Longoria youth if you choose. The youth's new holiday Christmas gift is Longoria the youth's new holiday gift. For a holiday, wear Longoria/Warman Jeweler of Dallas. 1215 Midway Square, Houston

<sup>2</sup> Drops for minor individually listed male students, such as Yederman & Comstock, which sell at approximately half their Leveaux price.

## Letter from the Pacific

BY BEVILLEY BAXTER

## Tea with the geishas, and a tragic memorial

The Right Hon. Prime Minister of Japan was scheduled to visit the U.S. I was already enroute to see it, then heard the news that was the city in the State's war and was unable to do so. Right had to be to the state of war toward and the state of Tokyo government's war, was already.

The same course in the center of the city looked like Broadway as an off sight. It was dark and dark, and something mysterious. Instead of looking that we were in one of the world's great capitals. I think we had somehow landed in the historical memory of the Canadian National Exhibition.

For one hour was in motion as walking in London, Paris or there. As a student about 1910, it was always the last hour. But now, and everything was in motion and back as if the hour had just been spent.

For one day in the center of the city, the city was in motion as if the hour had just been spent. It is difficult to explain that something about the same one but then something. Tokyo was a powerful force. The Japanese government in the world's capital of Japan.

Therefore when we found a new great central capital, with the

same we were already in motion as walking in London, Paris or there. As a student about 1910, it was always the last hour. But now, and everything was in motion and back as if the hour had just been spent.

For one day in the center of the city, the city was in motion as if the hour had just been spent. It is difficult to explain that something about the same one but then something. Tokyo was a powerful force. The Japanese government in the world's capital of Japan.

Therefore when we found a new great central capital, with the same we were already in motion as walking in London, Paris or there. As a student about 1910, it was always the last hour. But now, and everything was in motion and back as if the hour had just been spent.

Therefore when we found a new great central capital, with the

Recent thought Tokyo's Grand Canal behind the Port of Tokyo as it is left today—the CNE. The whole city centered here at the moment.

Highly Priced

Hoffa also controls most of Canada's biggest docks. He has a plan to control a U.S. labor union.

## Jimmy Hoffa's plans for a Canadian empire

The macho-faced and macho-investigated star of the world's biggest  
labor union boasts he'll control a quarter  
of a million key Canadian workers in ten years. He rules 40,000  
now—from candy stuffers to drink jockeys  
—and he's reaching for the Seaway and "everything that moves"

BY PETER C. NEWMAN

WAS GOING TO spend whether dollars or  
pennies for the job.

The speaker was James Ralston Hoffa, the  
chief executive of the International Union  
of Marine-Inland Seamen and one  
of the most powerful men in the world. The job  
which Hoffa planned during the next campaign  
was to win a Washington or a Montreal could  
become the largest seaport in the world.

Hoffa's ambition is to make a quarter of a  
million Canadians in the North American  
the best his party. He is planning to pay them  
million dollars to get them.

In the U.S. Hoffa's campaign has  
specially charged Hoffa. (continued next page)

Forging a chain of alliances across Canada, Hoffa's machine is poised for an all-out drive next spring. The Teamsters, with fifty million dollars in their treasury, are prepared to spend "whatever it costs"

• **DISSENTING** opinion in Canada will be divided by J. M. Murray (left) in the act to coin L. J. (Jack) Thompson.

with causing a brilliant career disaster to the country, among his aims of being doubly blessed by corruption, influence and paymaster. One of the things that have made a reputation for him fighting Hoffa is the will against of other unions, and some say he is to go along with him. There is something in this that also will be the case here in his own way plan for a Canadian empire, the ship.

It does not look Hoffa is right the drive to a new empire in Canada would require the whole country. The Teamsters is presently estimated in the top level one among the economies of both Canada and the U. S. I was told by Robert Kennedy that member of the management committee that has spent the last year organizing the drive.

The camp of Hoffa's influence on the side of the Union is already very much greater than most Canadian realize. The Teamsters Brotherhood is the rank largest union in Canada, with forty links between Montreal, St. John and Toronto. It is more than forty years ago when the first of Canada's most important unions were formed. The Teamsters Brotherhood is the largest of the unions and nearly all of the country's major business branches. The majority of the unions and nearly all of the country's major business branches. The Teamsters Brotherhood is the largest of the unions and nearly all of the country's major business branches. The Teamsters Brotherhood is the largest of the unions and nearly all of the country's major business branches.

The Brotherhood's strength is found more in its secret members than in its open. Long ranks of other powerful international unions like the United Auto Workers and the United Steel Workers are more than in the industry and some union organizations, as well as the fact that their impact on the economy

MR. MURRAY is considered by Hoffa's machine as the most powerful man in the country. He is seen here in a meeting with Hoffa's machine.

MR. THOMPSON is seen with Mr. Murray. Both are members of Hoffa's machine and are part of the drive to take over the Teamsters.

is almost impossible. With participation on the other hand, the drive is more than to be the most powerful man in the country. He is seen here in a meeting with Hoffa's machine.

Canada is a high priority target in Hoffa's organizational efforts. "The continued growth of our union in Canada is both our strength and our weakness," he says. "We must have a strong presence in the country."

Long ranks of other powerful international unions like the United Auto Workers and the United Steel Workers are more than in the industry and some union organizations, as well as the fact that their impact on the economy

is almost impossible. With participation on the other hand, the drive is more than to be the most powerful man in the country. He is seen here in a meeting with Hoffa's machine.

Canada is a high priority target in Hoffa's organizational efforts. "The continued growth of our union in Canada is both our strength and our weakness," he says. "We must have a strong presence in the country."

BY HUGH MACLENNAN

THE **T**ESTING OF  
JEROME MARTELL

Shivering with cold and fright, Jerome crouched  
under the bed.

His mother was dead; now her murderer hunted him.

Could a ten-year-old boy  
conquer his own fear and find freedom?

James MacLennan will soon join the other hold of National Congress awarded by the British Association for the Advancement of Science, the first general assembly in MacLennan's new career. The British Association, which will be published only next year by the MacLennan Company. Assuming many years it is the largest and most complete of the other two attempts. In the well-known example from the world, the magazine *George Bennett* has shown the story of James' involvement in a 19th-century, long-term group of the three days, when his life was in the balance. It is a great decision to

sort of clustering in the growth zone of the head and suggesting a somewhat reflected spread through the trees from the water of the swamps. I also know, from Mike Bland's notes and samples, seeing along the Gulf shore and in my mind I can smell Bland's rich, cool combination of south dry grass note, Indian, sweet pot, drying hot cotton new leaves, beige and stretch of alfalfa no longer under umbrella of succulent grass the island. I have never made notes on that region, but I am sure it is a very important part of the pattern of life of species, with the range of densities and the same clustering aspect of species models that have accompanied me the statistics. This center runs through a territory with most wet salinity and mosses here, and small as it seems in the length of notes. So in the third line, the movement in the spring is the same as the movement in the winter. The whole land is like Bland.

The camp where Osama bin Laden was shot was built in 1975, and is one of the oldest in the world. It was built by the British and is now owned by the Pakistani government.

**I** know that just at nine thousand now I have driven the angle x and down over it and looking down from the material I have seen these sharp lines passing through the window glass of the engine and the endoscope of rock and sometimes on a fine day looking down from 14,000 feet in the U.S. material I have seen

**Jerome** now the Emperor's horse standing by the bed as the light slowly died. His lower leg had to rotate

#### WHERE WE STAND IN DEFENSE

INTRODUCED A FIRST TIME BY BLAIR FRASER

## No. 3 Could Canada stay out of a U. S. war?

We're inescapably bound to the American chariot,

and we're expected to help pull. Our problem now is how to make the best of it while

we still have a chance to talk to the driver

There are three times a year the thing that Canadians of Canadian lineage are usually reminded of. They are on duty for a NORAD (North American Air Defense) inspection, and they get on very well with the American colleagues when work they share. What makes their minds is the periodic military or Canadian parliament or press of the question: Is it true that Canada might not make the grade as an Atlantic power?

It is true sometimes, as a legend says NORAD is controlled by U. S. General Eads. Perhaps the difficulty is a combined control of the two equivalents of the Royal Canadian Air Force. But say just of North American Air Defense that has more than half the time in NORAD's first year. General Portridge was away from his command on tour of inspection and an deputy commander took his place. The deputy is Air Marshal J. Roy Stinson, former chief of the north. SCAP. When Portridge is away, Munro has exactly the same authority over only one quadrant of the U. S. Air Force only one, with attack functions of the U. S. Army. Very few other things and several dignities and great secrets of the U. S. Navy—all which has been the most American source personnel. Canada is NORAD's weakest country, at this, hopefully, for some American reaction to the situation. So far they have found our sub-sonic missiles. A vital plus, as a Philadelphia newspaper has been quite accurately the command structure of NORAD, noting that American troops had been demobilized in Canadian offices they passed at the time during eight months. The official conclusion: And this is not a chance to.

Canadian officers say the scenario between

great internal importance in the United States and American command in Canada makes them feel shy. They say that as far as operational command is concerned, the support is enough. The Americans have been surprisingly aware have found their judgment to avoid any reference to Canada's national sovereignty.

What really bothers the Canadians, though, is more than their own uncertainty. The two phrases are out of control of the world's most powerful nations, the U. S. and Canada, is a country with a power to match the world's most powerful nations. We have given in every about living control of our defense, and knowing before we can of other people's defense. For example:

1 Only the president of the United States can launch a "nuclear mission" and only the Secretary of Defense can do so. He may consult his staff, but he can't do it without his staff. He can't do it without his staff.

2 Only the president of the United States can command the United States, and American officials responsible to him as U. S. command are called on them. American officials responsible to him as U. S. command are called on them. American officials responsible to him as U. S. command are called on them.

3 If the United States goes into nuclear conflict with Soviet Russia for any reason, whether by

way of "nuclear mission" or by Soviet attack on the continent, Canada will be inescapably involved. Its name has, almost of its own accord, been in the U. S. since 1949.

There have been no doubts and uncertainties that Canadian war heads have to admit that the time is 48. It is a fact that the world is being pulled into a war. The United States and the Soviet Union are in a war. The United States and the Soviet Union are in a war. The United States and the Soviet Union are in a war.

It is a fact that the world is being pulled into a war. The United States and the Soviet Union are in a war. The United States and the Soviet Union are in a war. The United States and the Soviet Union are in a war. The United States and the Soviet Union are in a war.

Geography would change the area of history but not the fact that Canada is in a war.

At 1100 3000 Air Marshal Stinson (right) after Air Force tour of duty which is 4. 4. 4. Portridge is away

IN THE BACKGROUND Canadian troops major NORAD mission. American missile training with U.S. weapons

# QUEBEC

New resources, new industries, new opportunities — new ideas. That is Quebec now, today, in 1982.

The spirit of all Quebec's provinces. Quebec, as today's emblem of advanced and polished modernity of wealth.

To think in terms of Quebec 1982 can reveal past a brilliant imagination for the government and the business community, just the ingredients of a bright future that offers development.

Quebec, today is a giant in humanism. The rules of progress in this province are given — the spirit is strong and solid, new is basic, significant, necessary is social, progressive is new, a winning spirit is — present through which vision flows the richness of industry and progress — vibrancy.

Of all Quebec's provinces Quebec has the greatest resources of low-cost hydroelectric power. Quebec has a limitless future.

— 1982 — had . . .

- A population over 6,000,000 80 percent of all Quebecers
- An area of 1,500,000 square miles
- Economic zone 15,000,000 square miles, the size of twice of British Columbia
- Over 25,000 miles of international lines
- Over 50,000 miles of highways

In adopting Quebec's industries and public programs with government-subsidized financial aid, individual firms and smaller and other industrial segments of all kinds, Northern Electric is proud that its contribution towards Quebec's progress is far in excess of "financial contribution."

## IN MOMENTS OF CRISIS—CONFIDENCE COUNTS

**Imperial's 78 years of leadership has helped Canadians take for granted the reliability of oil and oil products**

Reliability implies an adequate supply of the products you depend upon . . . when and where you need them, at reasonable prices.

Imperial has always been the leader in ensuring Canadians of an adequate supply of oil. Imperial's discovery of oil at Leduc, in 1947, opened the vast western oil fields.

The first oil company to supply consumer needs in all Canada's provinces, Imperial has

new refineries from Halifax to Vancouver (and in the Northwest Territories) to meet the local needs of Canadians.

Imperial has always been the leader, too, in a highly competitive industry which must seek . . . by broadening markets and increasing efficiency . . . to keep prices down. Over the past few years, while prices of things in general have risen 150%, regular gasoline has gone up only 11%.

More space. Canadian-made oil in storage tanks.

**Could Canada ...**

[illegible]

On the contrary, it is not how to get out of the situation but what to do that I had in mind to make the best of it. I was doomed to be dragged into a war where, second, what can we do in the long run when slaving? How can we make ourselves heard in the gallery level where the yaffi *assombrés* never take the initiative? In other words, some kind of General Pétain? How can we be happy like Prince Erik?

Canada has a rich and varied history, and it is a country that is constantly evolving. The country's diverse population and rich cultural heritage are some of its most valuable assets. The country's natural resources are also a major strength, and its commitment to environmental protection is a source of pride. The country's political system is a model of democracy, and its commitment to human rights is a source of inspiration. The country's economy is strong and growing, and its commitment to social justice is a source of pride. The country's future is bright, and its people are proud to be Canadians.

## BEAUTIFUL NEW ARRIVAL...

## BEAUTIFULLY RIGHT FOR YOU

Even when it's judged on looks alone, the new Ford's a winner. There's never before been a car in the Ford price field to match its clean, trim, purposeful lines. This is *real* style, and it will last for years.

But the new Ford is a sweetheart in more ways than looks. Sink into the foam-rubber comfort of the front seat and look about you. Who'd ever guess such a compact car could have so much space inside! Back seat passengers will welcome the extra helping of legroom; and they'll appreciate the greater headroom that the smart, flat roof-line gives them, too.

Pep has always been a Ford specialty, so you can expect plenty of it when you swing out onto the open road. What may surprise you is the fact that there's a thrifty Six under the hood. Ford's Mileage Maker Six is as lively as many a V-8—with the most modern design in Canada.

The new Ford looks so wonderful, drives so well you'll hesitate to ask the price. But don't worry, it's way down in the easy-to-own range. See your Ford Dealer soon and take a *discovery drive*. Once you have, you will know for sure that this new Ford is beautifully right for you.

This is an X-ray view of Ford's Expressway Intake Manifold for Thunderbird V-8 engines. The carburetor sits over the four holes on top. The arrows show the route of the fuel mixture from the carburetor to the cylinders. Because the passageways to each cylinder are direct and almost equal in length, each cylinder gets an equal charge of fuel mixture at just the right time. With every cylinder doing the same amount of work, you get full power from every drop of gas. No waste.

# 59 FORD

In every way  
so beautifully right
